

Technovent will be closed from Friday 21st December until Thursday 3rd January.
Orders received after Thursday 20th December will not be processed until the New Year.

We would like to wish everyone a Merry Christmas and a Happy New Year!

Technovent News:

We're award winners! Technovent is pleased to announce that we have been presented with the MediWales Industry Judges Award 2018, for the achievement and growth in the Welsh life science sector. The award presentation was held on the 4th December at Cardiff Museum.

Product Focus: Technovent Magnacap system

Technovent's titanium-based magnetic attachment system is based on a closed-field magnetic attraction between small, split pole magnets and magnetisable implant fixtures.

Key Features:

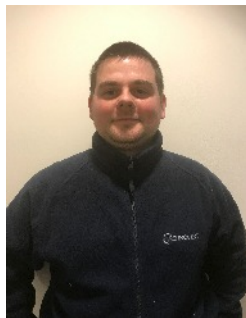

- Closed field-magnet is in prosthesis not in patient
- Low profile for easy patient hygiene
- Simple application technique
- CE marked and FDA approved

We fit a wide range of implants including, Straumann, Astra, Nobel Biocare and Cochlear. We can also make Magnacap/Magnabutments to custom heights.

Meet the Staff: Dispatch

Ryan looks after Technovent's goods inwards and also dispatches all UK and overseas orders.

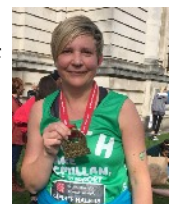

Other Technovent News:

Here at Technovent, it has been a busy couple of months with us welcoming new staff, the team going to the IASPE conference in Austria and the AAMP conference in Baltimore, and fundraising for charity.

At the end of September we exhibited at the International Association for Surgical Prosthetics and Epithetics (IASPE) conference in Linz, Austria and also ran a finger prosthesis workshop demonstrating the Spectromatch pre-coloured, HCR silicone gums.

On October 7th our Sales Manager Kath ran the Cardiff half marathon in aid of Macmillan Cancer Support and raised over £350.

To help raise awareness for Breast Cancer the team held a Bake a Difference Pink Picnic on Friday 19th October and donated £150 to Cancer Research Wales.

In late October we exhibited at the American Academy of Maxillofacial Prosthetics (AAMP) conference in Baltimore, Maryland and ran a workshop showcasing digital technology, the magnacap system and colouring techniques.
