

Welcome to the July edition of the Technovent newsletter!

Product Focus- G609 ProBond Adhesive

G609 is a water based adhesive used for the retention of a prosthesis to the skin. It can easily be removed with soap and water.

We are now able to supply the ProBond Adhesive in small 5g tubes, offering a convenient, easy application tube option for patients.

Product Code: G609T Price: £4.25

Meet the Staff- Laboratory

Introducing our laboratory team. These are the skilled people who manufacture Technovent's products...

Project Focus

The full body model Sam 1.1 which was configured for point-of wounding care after blast injury, is now finished and successfully trialled. This was part of an exciting project between Technovent, Trauma Simulation and PDR Surgical Design. Here is the timeline of the creation!

1) Each part custom made

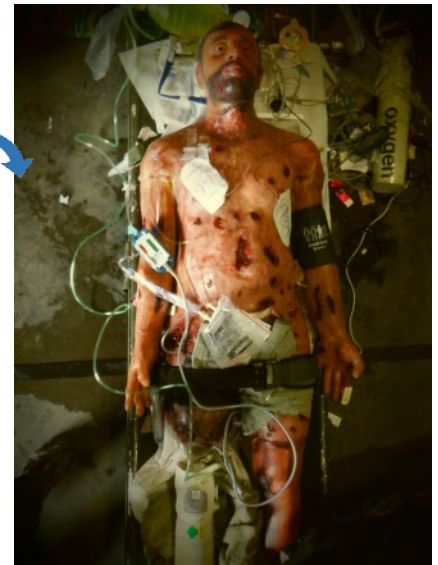

2) Moulding of whole body

3) Bringing the model to life

4) Final model (Sam 1.1) in action!

The role of Technovent in the project was to construct the individual body parts (e.g. muscles, airways, lungs etc) and then ultimately mould and finish the whole body. Several new products and innovative techniques were developed during the project in order to achieve the realism and functionality of the final model.

News

- The *Liberty* breast prostheses website is now live! Take a look... www.breast-prosthesis.co.uk
- Technovent will be attending...
 1. International Association for Surgical Prosthetics and Epithetics (IASPE):
28th - 30th September, in Linz, Austria.
 2. American Academy of Maxillofacial Prosthetics (AAMP):
27th - 30th October 2018, in Baltimore, Maryland.
- Due to the increase in raw materials and manufacturing costs, we must unfortunately implement a price increase on our products. We have avoided raising our prices for as long as possible but we can no longer avoid the inevitable. However all patient products (adhesives and removers) will stay at their current prices. (Please find our new price list enclosed).
- ProBond Remover (G608) is now back in stock! We apologise for any inconvenience caused from delayed deliveries.
