

Nasal Prosthesis Course

Day 1

Introduction.

Implant planning and clinical cases.

Introduction to magnets in facial prosthetics.

Demonstration- nasal impression and impression with magnets.

Lunch

Participants take impressions.

Demonstration making substructure.

Participants construct substructure.

Demonstration- carving a wax nose.

Participants carve noses.

Day 2

Participants continue carving noses.

Demonstration- trying on baseplate and attaching wax nose.

Participants finish carving and attach noses to baseplates.

Demonstration- flasking nose.

Participant's flask nose.

Demonstration- mould preparation.

Lunch

Participants prepare moulds.

Silicone Technology Lecture and Demonstration.

Colour matching demonstration.

Participants colour match silicone.

Day 3

Demonstration- deflasking and trimming nose.

Participants deflask and trim nose.

Demonstration- fitting nose, extrinsic colouration and sealing.

Participants extrinsically colour and seal nose.

Lunch

Demonstration E-skin and gel prosthesis technique

Pack and Colour Match (E-Skin) Gel Nasal Prosthesis.

Deflask and Extrinsically Colour Auricular Prosthesis.

Question and answer session.

Certificate presentation and course close.
