

SPRING 2023 - NEWSLETTER

TECHNOVENT MAGNET RETENTION SYSTEM

We understand there are currently issues regarding the supply of short implants for auricular use. However, we would like to confirm that the Technovent magnetic retention system is compatible with Southern Implants, AHEAD Implants, Nobel Biocare and many more systems. Our high strength retention system is ideal for use in Orbital, Nasal, Midface or Auricular prosthetic cases.

2023 UPDATE

We've had a busy start to the year with running our first Technovent course since 2019. It's been lovely welcoming course participants from Uzbekistan, Kazakhstan, Jordan, Denmark and the UK to our Auricular Prosthesis Course. We're looking forward to welcoming our next participants in May for our Nasal Prosthesis Course.

NEW AURICULAR MAGNET O-RING

A new and improved O-Ring (AUR-1) has been developed for the Technovent Auricular Magnet (MLL2-OR-S). This new O-Ring has increased longevity, ensures optimum retention and is easier to change if required. Please contact us if you would like a sample.
