

SOUTHERN IMPLANTS CATALOGUE

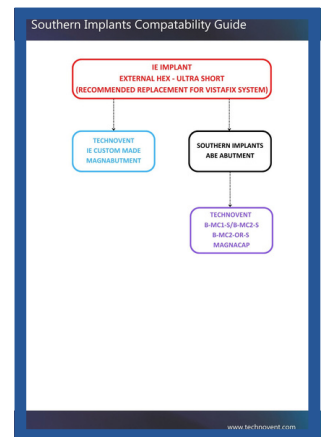

As I am sure you are aware, Cochlear have decided to end the sale and production of the Vistafix system this year. Although they are ending the sale of the products in December 2022, they will be supporting the system until the end of June 2023.

Although the Vistafix implants will soon not be available for new patients, you will still have ongoing patients implanted with these fixtures who will need replacement parts and prostheses. We would like to reassure everybody that Technovent will still fully support the Vistafix systems with our MagnaCap parts and have no plans to stop production while the need is still there.

In addition, Cochlear has recommended using Southern Implants extraoral system (IE implants) as a replacement for the Vistafix system. Please also be assured that our MagnaCap system is fully compatible with these implants in addition to their External Hex and IT implant range.

Please find enclosed our Southern Implants specific magnet catalogue which will give details of what parts to use.

If you have any questions about any of the above, please do not hesitate to contact us.

Magnacaps/Magnabutments - Non Sterile

MAGNACAP - TO FIT ARE ABUTMENT
